

Poland-IAEA Nuclear Energy Management School

21 September — 2 October 2026
Krakow, Poland

Deadline for applications
15 August 2026

Objectives

- To provide an international educational experience and an opportunity for worldwide networking with future leaders and managers of nuclear energy;
- To raise the awareness of the participants about recent developments in nuclear energy;
- To broaden the participants' understanding of key issues and challenges associated with the peaceful uses of nuclear energy;
- To introduce the participants to the leadership and managerial competencies needed to successfully implement national nuclear energy programmes.

Target Participants

The School is designed for emerging nuclear professionals across Europe who have the potential to become future leaders and decision-makers within the sector.
